

January 19th, 2026

Subject: Safeguarding the 2026 Midterm Elections

To All U.S. Governors:

We represent several hundred Indivisible chapters and allied groups across the United States.

We write to express our profound concern about the ongoing erosion of democratic norms and civil liberties under the current federal administration. As governors, you wield the most significant executive power available to counter federal overreach and defend the rights of your residents. We call on each of you to use that power to ensure the security and integrity of the 2026 midterm elections.

We are especially concerned that the measures needed to safeguard the integrity of the 2026 elections may not be initiated and fully in place soon enough. In light of our concerns about the erosion of democratic norms and the important roles you, your Attorney General, your Secretary of State, and State Election Board play in ensuring fair and fully accessible elections, we respectfully seek clarification on the following:

- What steps will you take to ensure that state and local election regulatory and oversight bodies maintain fairness and impartiality in the execution of their responsibilities before, during, and after primary and general elections?
- What standards and processes do you plan to promulgate to ensure comprehensive, accurate, transparent, and timely audits of election processes and results? If necessary, how will you request that your legislature enact these standards into statute?
- What steps will you take to safeguard election officials, poll workers, judges, and their families against threats and intimidation?
- What measures will you implement to strengthen public trust in the integrity and transparency of electoral processes?
- How do you plan to ensure that the reapportionment and redistricting of federal, state and local legislative districts are carried out transparently and equitably, providing all voters with equal representation?
- If practicable, how do you intend to mandate hand-marked paper ballots and establish clear chain-of-custody protocols to secure elections from interference?
- How do you plan to ensure fair enforcement of existing state absentee and mail-in ballot regulations and what is your strategy for seeking legislation to broaden voter access to absentee and mail-in voting?
- If your state requires voter identification for voter registration or voting, what steps will you take to ensure that free, state-issued identification cards are available to all eligible citizens? If not, how do you plan to seek legislation to implement such a program?
- How do you plan to safeguard voters' private election data by restricting unauthorized federal access, including access by the Department of Justice, to voter registration and prior election records?

- If the Department of Justice obtains voters' private election data in your state, how will you defend against lawsuits it may bring challenging voter registrations and absentee or mail-in ballots ahead of or during the 2026 election?
- What steps will you take to enforce existing state campaign finance regulations and what is your strategy to seek new legislation to impose strict contribution limits and require real-time transparency of "dark money" contributions and expenditures, including the timely identification of all contributing individuals and corporations?

We respectfully ask for copies of any plans, speeches, or other materials that may be shared with our member organizations throughout the country as exemplary models for other states and local jurisdictions to adapt and follow. Please transmit these materials to the individuals designated to relay the information to the group(s) identified in the "Reply To" section at the conclusion of this letter, following all signatures.

We gratefully acknowledge that many of you and your respective administrations are already undertaking the actions we are inquiring about.

We believe decisive action at this time is essential to ensuring free, fair, and trusted elections in 2026. We thank you for your public service and look forward to your responses to these urgent questions.

Respectfully,
